

One Page Summary

About

I am C. Jagadeeswar Reddy, currently pursuing a B.Tech in Computer Science and Engineering with a CGPA of 8.7. I bring a solid academic foundation and hands-on experience from internships at Virtual Maze and Indo-Euro Synchronization. Skilled in Python and C programming, as well as knowledgeable in Android development, I thrive in software development and enjoy tackling complex problem-solving tasks.

Intern & Projects

During my internships, I explored different areas and learned a lot. In a special program about Data Science, which took three months, I gained a deep understanding. I worked on a project predicting traffic, and I even created an Android app for it. Also, I worked on a project where I made it easier to download pictures from satellites to make maps. These experiences show that I can handle both the technical and practical sides of data science and making things work.

My Objective

I'm here to learn about new technologies and get advice for my upcoming project. I'm excited about the advice and help I'll get during this journey. I want to get hands-on experience with advanced technologies. and to learn more and get better at what I do, so I can work on projects that will really boost my career.
